

# Aaron Bond

## Science trainee teacher

### How did you find out about our teacher training?

I found out about teacher training from UCAS and GOV websites.

### What was your route into teaching?

I have been an Engineer for 10 years working on large industrial and commercial construction projects and always wanted to try my hand at teaching.

### How did you find the process from applying to starting?

The process was fairly straightforward and easy to complete. I thought with everything that's happening with COVID, AGS handled the process very well and were in constant communication.

### How would you describe your time at AGS so far?

AGS is a fantastic environment to teach and learn in, for which I am doing both! It has a great family feel and every student is cared for, and I think that is reflected in the student body's attitude and behaviour.

Acklam Grange is a fantastic environment to teach and learn in!

### What has been your favourite part so far?

I have really enjoyed getting to know the students and building a rapport with them.

## Thinking about teaching?
