

Matthew Kreczak

Maths trainee teacher

How did you find out about our teacher training?

I saw the SCITT advertised when searching for teacher training courses via the gov.uk website.

What was your route into teaching?

I went to college and university after completing my GCSEs, then I joined the RAF and served for 10 years before deciding to pursue becoming a teacher.

How did you find the process from applying to starting?

The whole process was very straightforward. It was just a case of following the guidance that is provided to you.

How would you describe your time at AGS so far?

I've really enjoyed it, my mentor is extremely knowledgeable of the teacher training process and I feel very well supported by her, and the rest of the school staff. I get the impression the school is very experienced in training SCITT students and it shows.

What has been your favourite part so far?

Getting in front of the students and seeing the pride they feel when they've achieved something.

I feel very well supported by my mentor, and the rest of the school staff!

Thinking about teaching?
